kpro

ENTERPRISE CAPABILITIES DECK

OUR IDENTITY

We Architect Enterprise Progress

Founded in 2014, Kpro Solutions is an engineering consultancy, SaaS product incubator, and enterprise digital transformation partner. We specialize in Generative AI, Big Data lakehouses, Edge IoT, and mission-critical cloud software.

10+
Years of Engineering Excellence

50+
Enterprise Engagements Delivered

4+
Proprietary SaaS Platforms

100%
Fixed-Cost Delivery Assurance

OUR PRINCIPLES

The Kpro Philosophy

Traditional technology consulting models are built on ambiguity, leading to project delays, scope creep, and runaway invoices. Kpro Solutions was structured from day

one to reverse this pattern. We believe in delivering robust architectures, predictable financials, and deep data insight with complete transparency.

Engineering Accountability

We write modular, heavily documented, and standard-compliant code, handing over clean files and full ownership with zero vendor lock-in.

Outcome Focused

We align scoping criteria directly with business ROI metrics rather than simply working through check-box hourly tasks.

True Collaboration

We embed with client internal teams, sharing telemetry skills, providing managed training, and enabling long-term self-sufficiency.

WHAT WE DO

Enterprise Engineering Services & Capabilities

From architectural design to full lifecycle production deployment, we deliver high-performance technical engineering services tailored to enterprise requirements.

Generative AI & LLM Systems

Custom Retrieval-Augmented Generation (RAG) pipelines, autonomous multi-agent cognitive networks, enterprise vector index architectures, and domain-specific fine-tuning.

RAG Pipelines | LangChain | Vector DBs | Multi-Agent AI

Explore GenAI →

Cloud & DevOps Engineering

Resilient multi-cloud infrastructure design, Infrastructure-as-Code (IaC), Kubernetes container orchestration, automated CI/CD deployment pipelines, and zero-downtime microservices.

AWS & Azure | Kubernetes | Terraform | CI/CD Pipelines

Explore Cloud →

Analytics & Big Data Lakehouses

High-throughput event streaming, distributed data lakehouses, real-time analytics dashboards, Apache Spark/Kafka pipelines, and predictive machine learning models.

Apache Spark | Kafka | Snowflake | Delta Lake

Explore Analytics →

IoT & Edge Telemetry

Industrial sensory data ingestion, edge AI inferencing, MQTT/OPC-UA device protocols, low-latency telemetry processing, and remote fleet health monitoring.

Edge AI | MQTT Protocols | Sensory Streams | Industrial IoT

Explore IoT →

Blockchain & Distributed Ledgers

Enterprise decentralized architectures, tamper-evident supply chain tracking, smart contract audits, asset tokenization protocols, and verifiable ledger networks.

Hyperledger | Smart Contracts | Provenance | Web3 Trust

Explore Blockchain →

Enterprise Web & Portal Engineering

High-concurrency web applications, micro-frontend architectures, secure REST/GraphQL API backends, responsive design systems, and enterprise internal tool development.

React / Next.js | Node.js | Microfrontends | GraphQL & REST

OUR SOFTWARE SUITE

Proprietary SaaS Products

In addition to custom consulting, Kpro engineers and operates a suite of commercial SaaS applications designed to streamline human resources, event logistics, and talent branding.

NyotaInvite

Smart Digital Event & RSVP Portal

EVENT TECH

A comprehensive digital invitation and RSVP management platform with customized guest itinerary landing pages, instant QR-code check-ins, automated WhatsApp/SMS notifications, and real-time attendance analytics.

- Personalized interactive guest itinerary pages & maps
- Automated RSVP tracking with meal and accommodation preferences
- Instant QR check-in & multi-channel guest reminders

Visit NyotaInvite | Learn More

Resumea

AI ATS Resume & Career Matching Engine

AI TALENT

An intelligent ATS resume optimization system that benchmarks CV formats against enterprise Applicant Tracking Systems, identifies missing technical keywords, and provides actionable structural recommendations.

- Real-time ATS compatibility scoring & parse validation
- AI keyword suggestion engine matched to target job descriptions
- Industry-tested executive and engineering resume templates

Visit Resumea | Learn More

HRHaaT

Unified Enterprise HRIMS Platform

HR TECH

An all-in-one Human Resource Information & Management System (HRIMS) that unifies automated payroll calculations, compliance filings, employee onboarding workflows, biometric attendance, and document repositories.

- Automated multi-tier payroll processing & statutory compliance
- Frictionless digital onboarding and employee self-service portal
- Integrated leave approvals, shifts, and attendance telemetry

Explore HRHaaT | Request Demo

BuildMyCV

Interactive Live Portfolio & CV Builder

CAREER SAAS

A dynamic personal branding web platform enabling professionals and graduates to launch live, interactive digital portfolios, hosted CV websites, and downloadable multi-format PDFs with custom subdomains.

- One-click conversion from profile data to a published personal website
- Interactive project showcases, GitHub repository sync & social links
- Export to clean, pixel-perfect PDF formats ready for recruiters

Explore BuildMyCV | View All Products

SOLUTIONS & UPSKILLING

Specialized Industry Solutions & Training

Bridging industry-specific algorithmic challenges and empowering engineering teams through hands-on corporate and college training programs.

Specialized Solutions

Custom AI & Optimization Engines

Engineered algorithmic solvers and vision intelligence built for complex industrial operational challenges:

ThirdEye AI Vision Monitoring

Edge computer vision scanning assembly lines in real-time, detecting defect rates at 99.8% precision with instant alerts.

SupplyChain ML Solver

Linear programming engines providing demand forecasting, route cost optimization, and dynamic safety stock recalculations.

Threat Analytics UEBA

User & Entity Behavior Analytics system continuously scoring behavioral anomalies and neutralizing insider data leaks.

→ Explore All Solutions

Upskilling Ecosystem

Corporate & Academic Programs

Practical, project-centric technical education led by senior architects with hands-on production code:

Corporate Engineering Upskilling

Tailored bootcamps for enterprise engineering teams covering Generative AI integration, Cloud & DevOps migrations, and Lakehouse pipelines.

Academic Placement Readiness

Intensive campus bootcamps, real-world capstone projects, coding assessments, and ATS resume workshops for engineering institutions.

Specialized Skill Tracks

Curriculum paths in PySpark, LangChain, Kubernetes, Full Stack TypeScript, and Cyber Threat Intelligence.

Corporate Training | College Training

TECHNOLOGIES WE MASTER

Python / PyTorch | AWS Cloud | Microsoft Azure | Docker & K8s | Apache Spark & Kafka | React & Next.js | Node.js & TypeScript | PostgreSQL & Vector DBs | LangChain & LlamaIndex

OUR LEADERSHIP

Executive Board & Directors

Guided by seasoned technologists, strategists, and domain leaders with decades of combined engineering experience.

AO

Alok Ranjan Ojha

FOUNDER & DIRECTOR

Spearheading corporate vision, strategic growth alliances, and high-impact delivery execution.

LinkedIn

BS

Bharat Shetty

DIRECTOR & CO-FOUNDER

Leading global operations, client engagement lifecycles, and outcome alignment parameters.

LinkedIn

RS

Rupak Sriwastwa

DIRECTOR & CO-FOUNDER

Overseeing database lakehouses, big data streaming pipelines, and infrastructure automation.

LinkedIn

SS

Sushma Shukla

DIRECTOR OF HUMAN RESOURCES

Directing talent acquisition, engineering team onboarding, and internal corporate training operations.

LinkedIn

PK

Priti Kumari

HR LEADER

Spearheading talent acquisition, human capital strategy, and engineering team operations.

LinkedIn

SK

Smita Kashyap

DIRECTOR OF FINANCE

Managing enterprise accounting, financial scoping predictability, and cost budgeting models.

LinkedIn

RR

Ritu Raj

DIRECTOR OF ANALYTICS

Engineering time-series forecasts, computer vision algorithms, and predictive ML systems.

LinkedIn

PS

Priyanka Shukla

DIRECTOR OF SAAS PRODUCTS

Spearheading product lifecycles, ATS profiling engines, and responsive portal development (BuildMyCV).

LinkedIn

OUR TIMELINE

Corporate Milestones

2014

Company Founded

Kpro Solutions was incorporated in Bengaluru, India with a core focus on custom analytics services and database designs.

2016

Big Data & IoT Integration

Scaled operations to support real-time data stream pipelines and edge sensor telemetry integrations, serving logistics enterprises.

2019

Launch of Proprietary Solutions

Released specialized analytics products including ThirdEye (automated vision tool), Supply Chain Analytics, and Threat Analytics UEBA engine.

2022

Decentralized Ledgers Expansion

Integrated advanced blockchain architecture services, helping banking and supply chain clients structure high-trust ecosystems.

2026

Renovation & Global Delivery

Modernized SaaS product lines (NyotaInvite, Resumea, HRHaaT, BuildMyCV), deployed GenAI architectures, and standardized the outcome-based "True Fixed Cost Model" globally.

ENGAGEMENT MODEL

Why We Champion the "True Fixed Cost Model"

Hourly billing aligns a consultancy's financial motivations against the client's goal. The longer the developers take, the more the consultancy profits.

Under Kpro's outcome-based model, we invest significant architecture hours upfront to clarify scopes, define schemas, specify delivery milestones, and sign off on a guaranteed cost.

Discuss Your Scoping Needs

1. Risk Absorption

If unexpected engineering challenges appear during sprint development, Kpro absorbs all extra labor expenses, not the client.

2. Strict Delivery Commitments

Scopes are tethered to chronological calendar milestone reviews. We execute with extreme discipline to maintain delivery timelines.

3. Measurable Value

Because project metrics are detailed precisely before writing code, stakeholders can calculate exact ROI projections beforehand.

TRANSFORM WITH US

Ready to Build, Scale, or Modernize with Kpro?

Whether you need an enterprise AI system, SaaS platform consultation, big data pipeline, or upskilling bootcamp, we're ready to partner with you.
